

Neck lumps quiz

Examine the schematic image of the neck below. For each of the zones try listing as many differential diagnosis for a lump that presents in that area. For each diagnosis think about how you would differentiate it from other lumps by your history and examination.

- Level I: Submandibular gland tumour *, tooth abscess
- Level II: Branchial cyst, parotid tumour *
- Level III: Branchial cyst
- Level IV: Paraganglioma
- Level V: Cystic hygroma
- Level VI: Thyroglossal cyst *, thyroid goitre and cyst, dermoid cyst

Thyroid lump → moves on swallowing

Thyroglossal → cyst moves on tongue protrusion

Cystic hygroma transilluminates
